

Yves Briers, Laboratory of Applied Biotechnology,
Ghent University, Belgium

Yves Briers is co-inventor of the concept of Artilysin®s, novel enzyme-based antibiotics, which are commercialized as a technology platform by Lysando AG. He held postdoc positions at ETH Zurich (Switzerland) with a long-term fellowship of the European Molecular Biology Organization (EMBO) and at KU Leuven (Belgium). In May 2015 he was appointed as assistant professor to head the Laboratory of Applied Enzymology at Ghent University. His research interests are the synthetic

biology of modular proteins with applications in industrial and medical biotechnology.
