

Ana M. López Contreras is a senior scientist at Wageningen Food and Biobased Research, part of Wageningen University and Research (Wageningen, The Netherlands). She has wide experience on the production of fuels and chemicals by fermentation of second generation biomass. She has participated or directed several projects on bioalcohol production. Current examples are EU MACROFUELS (2016-2019), and the Dutch financed TKI- BBEG BioJetFuel. She has published >20 peer-reviewed scientific articles, 4 book chapters and many reports on biotechnology for fuel and chemical production, and has successfully directed 3 PhD thesis and currently supervises 2 PhD students.
