

Dr. Sandra Cortès

Sandra Cortès is the CSO of Synthelis. Sandra has extensive experience in protein expression and functionalization, as well as in the design of bio-chips. She holds a PhD in Structural and Functional Biology from Joseph Fourier University. After her studies she was a research associate at the Alternative Energies and Atomic Energy Commission ([CEA](#)) in Pr. James Tabony's lab, then at the Albert Bonniot Institute ([IAB](#)), in the "Analytical Immunology of Chronic Diseases" group, directed by Dr. Patrice Marche. Her last position before joining Synthelis in 2012, was in the Techniques in Medical Engineering and Complexity (TIMC) laboratory, with Pr. Jean-Luc Lenormand.
