

Dr. Jianan Zhang is now working at Institute of Nuclear and New Energy Technology in Tsinghua University. His research fields are bioenergy, biochemical engineering and utilization of lignocellulose biomass, mainly focusing on integrated technology for bioenergy and biorefinery from lignocellulose including bioethanol, biobutanol, biodiesel, biojetfuels, 2,3-butanediol, xylitol, succinic acid, bioethylene, lignin derived products. He has got international collaboration projects with Norway Statoil Petroleum AS, University of Chemistry and Technology Prague in Czech Republic, American Boeing Company, DuPont, Italy Chemtex, Malaysian Palm Oil Board and European Sixth Framework Program.
